PROFILE

A Computer Science Graduate from National University – Laguna. An aspiring Systems developer with experience in developing web-based application using Laravel. Strong interest in building systems solutions and improving user experience. Eager to contribute technical skills and grow in a professional development environment.

PROFESSIONAL EXPERIENCE

February 2022 – May 2026

UNIVERSAL ACCESS & SYSTEM SOLUTIONS INC. | INTERN (300HRS OJT)

- Developed and presented a Laravel-based **Employee Deployment Management System** that allows the user to manage the deployment status of employees.
- Developed and presented a Laravel-based **Employee Onboarding Tracking System** specially for HR department to track the progress of submitted requirements of employees.
- Provide Technical support for hardware and systems solutions.

PROJECTS

THESIS – Fake News Detection in the Philippines Using Sugeno System: A Fuzzy System Logic Approach

- Collaborate with team and developed a **Python** model that reduces uncertainty in Filipino News including text-in-images by adding threshold values to determine the reliability of the news using the Rule-Based Sugeno System a Fuzzy Logic Approach.

LORSKIE RMS

- A collaborative Retail Management System project using **HTML/CSS, PHP, and MySQL**. Involves managing daily operations of the retail business including the inventory of stocks inserted in database.

UASTRACK EMS

- An Employee Deployment Management System Framework using **Laravel** allows the user to add, remove, edit, view, and track the employee's status, tenures, and client deployment. The project was developed using **HTML/CSS, PHP, JavaScript, and MySQL**.

EMPLOYEE ONBOARDING TRACKING SYSTEM

- An Onboarding management system project that specifically developed for HR department. The project allows the user to add and manage the checklist progress of requirements submitted from the employees. The project includes summary of completion, progress, and exportation of csv data. The project was developed using **Laravel Framework, HTML/CSS, PHP, JavaScript, and SQLite**.

MARKET BASKET ANALYSIS

- An SQL script that used for analysis of customer's purchasing patterns to identify product associations and optimize inventory management. The script was written using **MySQL**.

UNDEAD ASCENSION

- Developed a game using **Scratch.MIT**. A bird's eye view shooting game where the player must slay hordes of undead creatures to survive as long as they can.

EDUCATION

2022 – 2026

NATIONAL UNIVERSITY - LAGUNA

Bachelor of Science in Computer Science

2020 – 2022

STI COLLEGE – FAIRVIEW

Science, Technology, Engineering, and Mathematics (STEM)

Certifications

Cisco Networking Academy

- Introduction to Cybersecurity
- Introduction to Data Science

Workshop and Other Experience

Innovate and Elevate (2023)

- Participated in a one-day hackathon organized by Diversified Robotic Inc. and NU-Laguna, where I collaborated with a team to develop and present a prototype of Emergency Hotline Solution inside Laguna called "NUTatawagan" using Microsoft **PowerApps**.

Game Developers Camp (2020)

- Attended a free hands-on workshop at STI College – Fairview. Designed for high school students to explore potential career paths, gain introduction for programming logical thinking and developed a game using Scratch.MIT

SKILLS		Tools	
• Web Developing	• Visual Basic	• MS Office	• Claude
• System Developing	• MySQL	• Laravel	• Copilot
• Java	• SQLite	• Bootstrap	• Perplexity
	• Python	• Git	• Visual Studio
		• GitHub
